## **WORLD EXPANDS MAN O’WAR FAMILY WITH 18° HEAD FOR 302/351 FORDS**

World Products has developed a new high performance 18° aluminum cylinder head for the 302/351 Ford engine. This latest addition to World’s Man O’War family is offered with 200cc or big 235cc intake runners, providing builders with the optimum balance of flow and velocity for a variety of engine displacements and valve train combinations. The 18° valve angle allows use of OEM Ford valve train components.

The 200cc head comes with 2.055” intake and 1.600” exhaust valves, while the higher flowing 235cc head is designed for 2.100” intake and 1.625” exhaust valves.

Featuring a highly efficient 64cc combustion chamber and World’s highly regarded RightCast® port technology, the Man O’War 18° heads provide outstanding out-of-the-box power and are an excellent choice for street/strip applications.

Manufactured from premium grade 355-T6 aluminum alloy, World’s Man O’War 18° heads are offered bare or in complete assemblies –which include genuine Manley stainless steel valves and ARP hardware. They are offered with several spring packages to accommodate camshafts with lifts to .700”.

For additional information on the Man O’War lineup visit World’s website ([www.WorldCastings.com](http://www.WorldCastings.com)) or call 631-981-1918. A complete full-line catalog is available upon request by phone, e-mail, or by writing to World Products, 51 Trade Zone Court, Dept. \_\_\_\_, Ronkonkoma, NY 11779.
